

OFFICE OF U.S. CHIEF OF COUNSEL
FOR THE PROSECUTION OF AXIS CRIMINALITY

53.007

DOCUMENT ROOM INTERROGATION ANALYSIS

WITNESS: Karl Brandt
BY : Major Monigan

DATE: 1 October 1945
1030-1215
PLACE: Nurnberg

NAME HEADINGS : Brandt; Hitler

INDEX HEADINGS: Atrocities

Referring to an earlier interrogation, witness does not recall ever having spoken to General Gebhardt about sulfanilimide experiments (1-7). Nor was he present at a discussion of the effect of sulfanilimide on gasbrand at the Military Medical Academy in Berlin (8-13). He did not know of Dr. Rascher and the undercooling experiments (13-14). He knew of the Ahnenerbe, but not of its work (14-15). Discussion of euthanasia: Witness believed in killing the incurably ill or insane; authority was given by Hither in a permissive decree, rather than legislation, and physicians acted in each case on their own responsibility (15-19).
