1 November 1945

MEMORANDUM FOR COMMANDER DONOVAN.

Subject: Still Photographs.

1. This will refer to your memorandum of 31 October 1945 concerning the above subject. It is noted that the photographic library "contains tens of thousands of photographs, many thousands of which concern Germany's planning, launching or waging its aggressions". In view of the overwhelming bulk of this material and the lack of sufficient personnel under which we both appear to be laboring, it is requested, in order to expedite consideration of this material, that someone familiar with the photographic library assemble a roughly representative sample (preferably not over 100) of the many thousands of photographs concerning Germany's planning, launching or waging its aggressions included in the tens of thousands contained in the library.

2. If you will kindly advise me when this assembly has been made I will arrange for an inspection of it and for consideration of further action.

SIDNEY J. KAE LAM
